RE: Detection System Implementation
Date: November 14, 2019

Dear Parents/Guardians,

Cherokee County School District is implementing detection systems to scan visitors entering any school in the district. Upon entering the building, all visitors will walk through the detection system before signing in to the office. Our top priority is the safety and security of our students and staff members. In addition to having school resource officers at each of our schools, we believe the detection systems will help enhance our safety efforts. While we understand this may result in some inconvenience, we believe student and staff safety should always come first.
